

SAFETY FIRST! 3M Reflective Products Save LIVES!

*The National Waste & Recycling Association (NWRA) reports a recent spike in road accidents involving waste and recycling workers. Looking at root causes they determined they and lawmakers must engage the public. States are adopting “**SLOW DOWN to GET AROUND**” laws and public education and awareness programs, similar to laws that say you must stay three feet away from a bicyclist on the highway. NWRA studies show 38% of drivers on the road are tempted to speed around the trash truck, with a large percentage being younger drivers (18 to 34 years old). YOU CAN help save lives of drivers and workers by using **REFLECTIVE** signs and markings on your vehicles. CMG can assist you with cost-effective solutions.*
